

Yanbo Wang

yanbo.wang.1@stonybrook.edu | (929)-601-9692 | github.com/yanboww

Education

Stony Brook University

Expected May 2029

B.S. in Computer Science, Honors in Computer Science | GPA: 4.00/4.00

Skills

Languages: Java, C++, Rust, Python, Swift, SQL

Frameworks: SwiftUI

Database: MySQL

Tools/Platform: Git, Docker, Linux, Xcode, Aiven

Experience

Problem Solving Intern, ICPC Foundation – Remote

Feb 2026 – Present

- Analyze and present one Codeforces problem each week, explaining constraints, algorithm selections, and time and space complexity
- Implement and test C++ and Java solutions using dynamic programming, greedy, binary search, bitmasking, and game theory

Lab Assistant, Embedded Systems Design Lab – Stony Brook, NY

Sep 2025 – Present

- Maintain and audit inventory of 625 embedded systems components used in undergraduate laboratories
- Solder test probes and assemble prototype breadboards for embedded systems experiments
- Diagnose hardware malfunctions involving embedded chips and LCD using C and Tera Term

Front Desk Manager, Kuei Luck Summer Camp – Fresh Meadows, NY

Summers 2022 – 2023

- Coordinated daily arrivals and dismissals for 100+ campers with 15 teaching assistants
- Managed weekly lunch form and activity logistics across eight classrooms
- Administered weekly exams, graded daily homework, and provided remedial lessons for 24 campers

Projects

Enyay-oj - Online Judge | Rust, JavaScript, MySQL, Docker, Aiven

github.com/3nya/enyay-oj

- Built a Docker-based code execution sandbox supporting C++ and Python, capturing runtime and memory usage for each submission
- Added semaphore-based concurrency limits for judge workers and database transactions, reducing risks of resource exhaustion due to malicious submissions
- Established the request pipeline from the frontend JavaScript API call to Rust judge endpoints and MySQL storage

Brooklout Tech - iOS Game | Swift, SwiftUI

github.com/yanboww/Escape-Btech

- Collaborated on four mini-games for a level-based iOS game using Swift and SwiftUI
- Implemented sprite movements, idle animations, and effects using SpriteKit
- Incorporated 63 original sprites and interface assets
